# PLUG & PLAY MONITORING AND CONTROL OF PUMPS

Birdseye is an effectiv solution to monitor and control one or several pumps .

With user friendly design
We offer control and monitoring via a 7 inch touch screen, this means you can easily read status, as well as control via a very easy user interface.

The system is 100% pluggable!
This allows anyone can install the system, electrician is not required.

Save energy- and maintenance costs
Birdseye is delivered connected to a VFD and sensors via network cables where all data can be read, as well as best efficiency point (BEP), this reduces both energy and maintenance costs.

There is an option to connect externally via a router Wi-Fi/4G/5G and send data to Amazon cloud for remote reading. Bluetooth is standard, and the sensors can be read with this technology.

Alarms can easily be configured, and sent by e-mail or SMS.

Applications:

- Free standing pumps and stations
- View alarms and status
- Monitoring with many options
- Manual control of pumps with adjustments of setings and parameters

Main benefits:

- Minimise operating cost
- Get alarms before it is too late
- Very simple to use
- Scalable
- Pluggable power connection, pluggable sensors IP68
